**Subject:** TTracker Dates for Arkema and Koppers  
**Date:** Wednesday, August 27, 2014 3:19:00 PM

---

Tammy and Joe,

I entered dates into Travel Tracker for trips to Arkema and Carbondale.

Arkema – Oct 21 & 22 Mike Pinto, my counterpart, will arrange for his consultant to let us on the site and can do so at any time. GLNPO may be sampling this week, per a recent email. Juan is inquiring into BASF access for these dates.

Carbondale – Oct 14 & 15 Mike Slenska, my counterpart, will arrange for his caretaker to let us on the site and provide a tour (he has a big pick-up that seats five uncomfortably). I can also give a tour but if the roads are muddy, then the rental car will be risky. I anticipate Lloyd the caretaker driving while both of us describe the site. Alternatively, with sufficient notice, Beazer would meet us at the site.

**Note:** We usually take the train which is very comfortable (and “green” travel), then rent a car for local transport. Will MG agree to the train? Please let me know soon so that I can reserve a govt van in time to get one if needed.

Variables that could become unwieldy (I’d prefer to just try to coordinate the tour):

- 1) Brightfields second public meeting
- 2) EPA meeting with Concerned Citizens of Carbondale (we haven’t heard a word back from them since the July 29 letter)
- 3) EPA’s next public meeting

Please let me know if you are amenable to tours on these dates, and if MG is available for the Cdale tour (I am wary because she cancelled three meetings with the Carbondale Mayor that RG had arranged).

Please note that I am unavailable Oct 27, 28, 29.

Thanks.

Carolyn
